Hammond, LA

Cameron is a leading provider of flow equipment products, systems and services to worldwide oil, gas and process industries. From our Valves & Measurement business segment, we offer products primarily used to control, direct and measure the flow of oil and gas as it is moved from individual wellheads through flowlines, gathering lines and transmission systems to refineries, petrochemical plants and industrial centers for processing.

Cameron is a complete systems solution supplier, delivering new levels of efficiency and cost savings to our customers due to our full in-house capability to provide controls engineering and manufacturing together with choke, actuation and automation expertise, as well as project management, system engineering, operability and training.

Our TEXSTEAM plug valves have a long history of reliability in tough service conditions such as H₂S, CO₂ and abrasive or severe service applications. TEXSTEAM valves are designed for high corrosion resistance, bubble-tight sealing, high wear and high impact resistance.

TEXSTEAM SUPER G PLUG VALVES

DESIGN STANDARDS

The TEXSTEAM super G's reputation for tight shut-off and long service life has made it a preferred valve for manifold and production services in erosive environments.

Super G valves conform to the latest edition of the following industry specifications as applicable:

- B1.20.1 - Pipe threads, general purpose
- B16.5 - Pipe flanges and flange fittings
- B16.10 - Face-to-face and end-to-end dimensions of valves
- B16.25 - Butt welding ends
- B16.34 - Valves-flanged, threaded and welding end
- API - American Petroleum Institute
- 6D - Specification for pipeline valves – monogram available
- 6FA - Fire-test for valves
- MSS - Manufacture's standardization society of the valve and fittings industry
- SP-6 - Standard finishes for contact faces of pipe flanges and connecting end flanges of valves and fittings
- SP-25 - Standard marking system for valves, fittings, flanges and unions
- SP-55 - Quality standard for steel castings for valves, flanges, fittings and other piping components (visual methods)
- NACE MR0175 - Sulfide stress cracking resistant metallic materials for oil field equipment
- Equipped with a lock open/close position indicator

Metal-to-Metal Seating

- Hard coated plug (70 Rc)
- Erosion resistant design
- Maximum service life

Sealant Injection

- Internal sealant path to provide sealing on damaged seats
- Extended service life
- Lower torques

Other Features

- Ease of actuation
- Round ports-low turbulence/pressure drop
- Valve bores to match pipe bores
- API 6D and NACE MR0175 standard
- Fire-safe to API 6FA
- Locking device standard
- Valve position indicator standard

In Line Repairable

- Top entry, field repairable - no special tools, machining or training required
- Teflon encapsulated cover for easy removal
- Plug and seats fully interchangeable without lapping
- Built and tested in accordance with API 6D and B16.34
- Pressure Balanced Plus™ - low torque
- Full port or reduced port
- Blowout-proof plug - integral plug and stem
- Construction to NACE MR0175 standard
- Wrench, bar or worm gear operated - actuator compatible
- Renewable plug, seats and trim parts - fully interchangeable without lapping
- Round ports-low turbulence/pressure drop
- Equipped with a lock open/close position indicator

TEXSTEAM SUPER G PLUG VALVES

PART LIST

When ordering Parts, please furnish Item Number and Part Name as given below, plus Valve Model, Size and Working Pressure.

Item	No. Required	Description	Material
1	1	Collar retaining ring	Steel, nickel plated
2	1	Locking collar position indicator	Steel, nickel plated
3	1	Dirt excluder	PC Buna-N
4	1	Adjusting nut	See Note 1
■	5	Thrust bearing	Alloy steel
●■	6	Packing ring	Grafoil
●■	7	Body O-ring	Buna-N standard*
●■	8	Packing plate	316 Stainless steel
●■	9	Stem packing	Grafoil
●■	10	Backup ring	Teflon
●■	11	Stem O-ring	Buna-N standard*
▲■	12	Plug	1018 Steel chrome plated*
■	13	Seat	Nickel alloy ASTM B584
■	14	Seat O-ring	Buna-N standard*
■	15	Spacer ring	Alloy steel, nickel plated
	16	Stop screw	304 Stainless steel
	17	Lock washer	Stainless steel
	18	Lock plate	Carbon steel, zinc plated
▲	19	Lube check	316 Stainless steel
▲	20	Button head fitting	316 Stainless steel
	21	Body	See Note 1
●	1	Packing Plate Assembly Parts	
▲	1	Plug Assembly Parts	
■	1	Repair Kit	

* Other materials available consult factory.

Notes:

1. ANSI Class - ASTM A352 LCC;
API - ASTM A487 GR4C

Note: 6 in. Full Port ASME 900 and ASME 1500 have the same Face-to-Face as Reduced Port.

TEXSTEAM SUPER G PLUG VALVES

COMPARISON CHART: SUPER G VS. CONVENTIONAL PLUG VALVE

Performance Feature	Super G	Plug Valve
Top entry – field repairable	Yes	No
Replaceable metal-to-metal seats	Yes	No
Part interchangeability	Yes	No
Integral plug and stem – no dead band	Yes	No
Low pressure drop	Yes	No
Round port/low turbulence	Yes	No
Full port	Yes	No
NACE standard	Yes	No
Sealant injection	Yes	Yes
Erosive service	Yes	Yes
H ₂ S service	Yes	Yes
CO ₂ service	Yes	Yes

Super G
Solve Wedging Problems

Unpressurized area at stem results in lifting force "F" which prevents wedging of plug.

Pressure Drop Across Valve

$$\Delta P = (\rho / 62.4) \times (Q / C_v)^2$$

Where: ΔP = Pressure drop (psi)
 ρ = Fluid density (lbs/ft³)
 Q = Fluid flow rate (gallons/minute)
 C_v = Flow coefficient of valve

Given: Water at 200°F flows through a 4 in. Reduced Port (RP)
 TEXSTEAM Super G plug valve at a flow rate of 400 gallons per minute.

ρ = 60.1 (lbs/ft³) @ 200°F.
 Q = 400 gallons/minute.
 C_v = 584

Find: Pressure drop, DP, across valve.

Solution: $\Delta P = (60.1/62.4) \times (400/584)^2$
 $\Delta P = 0.963 \times (0.685)^2$
 $\Delta P = 0.963 \times 0.469$
 $\Delta P = 0.452$ psi

TEXSTEAM SUPER G PLUG VALVES

SINGLE BODY/DUAL PLUG DOUBLE-BLOCK-AND-BLEED PLUG VALVE

Exclusive Features

- Double block-and-bleed in single valve length
- Reduced connections for faster Installation and reduced leak paths
- Built and tested in accordance with API 6D and B16.34
- Top entry, field repairable – no special tools or training required
- Pressure Balanced Plus™ – low torque
- Fire-safe to API 6FA
- Blowout-proof plugs – integral plug and stem
- Construction to NACE MR0175 standard
- Each closure assembly is wrench, bar, worm gear or actuator compatible
- Renewable plugs, seats and trim parts – fully interchangeable without lapping, special fitting or machining
- Round ports – low turbulence/pressure drop
- Equipped with lock open/close position indicators on each closure assembly

When ordering parts, please furnish Item Number and Part Name as given below, plus Valve Model, Size and Working Pressure. The quantities listed are for one plug assembly.

Item	No. Required	Description	Material
1	1	Collar retaining ring	Steel, nickel plated
2	1	Locking collar	Steel, nickel plated
3	1	Dirt excluder	Buna-N
4	1	Adjusting nut	See Note 1
5	1	Thrust bearing	Alloy steel
6	1	Packing ring	Graphite
7	1	Body O-ring	Buna-N standard*
8	1	Packing plate	316 Stainless steel
9	1	Stem packing	Graphite
10	1	Backup ring	Teflon
11	1	Stem O-ring	Buna-N standard*
12	1	Plug	1018 Chrome plated*
13	2	Seat	Nickel alloy ASTM B584
14	2	Seat O-ring	Buna-N standard*
15	2	Spacer ring	Alloy steel, nickel plated
16	1	Stop screw	300 Stainless steel
17	1	Lock washer	Stainless steel
18	1	Lock plate	Nickel plated
19	1	Lube check	316 Stainless steel
20	1	Button head fitting	316 Stainless steel
21	1	Body	ASTM A487 4C* Note 1

* Other materials available consult factory.

Kit	Quantity	Description	Item Numbers Required
1	2	Packing Plate Assy. Part	6, 7, 8, 9, 10, 11
2	2	Plug Assembly Part	12, 19, 20
3	2	Repair Kit	6, 7, 8, 9, 10, 12, 13, 14, 15

Notes:

1. ANSI Class - ASTM A352 LCC;
API - ASTM A487 GR4C

NOTE: 6 in. full port ASME 900 and ASME 1500 have the same face-to-face as reduced port.

CAMSERV™ AFTERMARKET SERVICES

The goal of Cameron's Aftermarket Services is to help our customers lower the total cost of valve ownership. To that end we offer a full range of services from over twenty-five Service Centers worldwide and can provide experienced personnel trained to meet the specific service requirements of each valve type.

Aftermarket Services

- Supplies replacement valves and parts:
 - Maintains a full inventory of new and reconditioned valves for immediate delivery
 - Provides factory warranty support for all Cameron OEM brands as well as service for most other valves
- Field Service and Technical Support
 - Field service technicians on call 24 hours a day 7 days a week to handle service issues wherever they arise
 - Provides equipment installation, field repairs, as well as track and perform scheduled maintenance
- Customer Property Repair
 - The Customer Property Repair program allows Cameron's valve customers to store assets at our service centers throughout the world
 - Valves tracked in electronic database accessible through the Internet
- Remanufactured Products
 - Offers a broad range of API-compliant reconditioned equipment with fast delivery
- Total Valve Management
 - Supply and service automation and control packages
 - Assist with valve installation, commissioning and startup
